

Skyline Genuine Graphics

Skyline leads the exhibit industry in producing large-format graphics to create effective communication. Skyline produces the highest quality graphics in a variety of print methods to fit your budget.

Reasons why Genuine Skyline Graphics stand out in a crowd, and information about how to keep them looking great:

Why Skyline Genuine Graphics are the Highest Quality Graphics

- We protect your graphic with heavyweight, scratch-resistant heat laminates
- We laminate our graphics in a 'clean room' environment to reduce dust and dirt
- Our digital artwork is set up on an electronic grid system based on our hardware sizes
- Integral graphic panels are cut on computer-controlled cutting machines for extreme accuracy
- Integral panels are produced on special tables for consistency
- Before shipping, our graphics are applied to the appropriate display components to ensure a perfect fit

How to Keep Your Graphics Looking Like New!

- Handle carefully to prevent bending or kinking
- Follow the instruction label on the back of the panel regarding rolling directions
- Do not roll the panel tighter than 10" diameter
- Store in original protective plastic wrapping
- Store in temperatures between 60° and 85°

Thank you for choosing Skyline Genuine Graphics
